

Clinical Practice & Education has a new structured pharmacy orientation to integrate new pharmacy hires into the HHS team. This initiative aims to prepare staff by building skills in drug distribution, medication management and pharmaceutical care. Staff experience both classroom and hands-on teaching that is rooted in team work, patient safety and best care for all. This orientation complements the HHS Orientation Pathway and addresses specific needs for pharmacy staff that allow for a smooth transition into their roles within the clinical team and the Department of Pharmacy.

To register, visit the Education intranet site and complete the [on-line Registration](#).
