

The Central Venous Access Devices (CVAD) Workshop is an interactive, multimodal, educational event for both new learners and existing staff who wish to refresh their CVAD knowledge and skills. Learners will have the opportunity to review policy, procedures and practice techniques relevant to HHS care and maintenance of central venous access devices.

Topics covered:

- Types of CVADs at HHS
- CVAD dressing changes
- Blood sampling and blood cultures from CVAD devices
- CVAD locking and flushing

Learners **must complete** Step 1 of the CVAD e-Learning module prior to attending this CVAD Workshop.

Educators register staff for this e-Learning course using the LMS.
